Ice Cream In a Hurry

Only 5 Cents in Ice and 5 Minutes in Time Required to Make 100 Plates

A wonderful Ice Cream Freezer is being shown at our Store. It makes Ice Cream on an instant's notice. You no longer have to buy Ice Cream at the store, but you can turn it out at home cheaper and in less time than the most expert Ice Cream maker in the City can do it.

The little machine is simple in construction and requires but 5 cents' worth of Ice to make a hundred plates of Ice Cream in five minutes.

The cost of the machine is moderate—in fact, so cheap that the poorest family can afford.

COMMERCIAL CLUB ENDORSES EXPOSITION

The Commercial club of this city, through its board of directors, has heartily endorsed the Land and Irrigation exposition to be held in Chicago November 20th to December 4th of this year, and has voted its approval of this exposition in the following resolution:

"Be it resolved by the board of directors of the Commercial club of Las Vegas, in regular meeting assembled, that they heartily approve and endorse the aims and objects of the Land and Irrigation congress to be held in Chicago, November 20th to December 4th, 1909; and

"Be it further resolved, that they consider it important and essential that all portions of the territory of New Mexico be adequately represented by delegates and exhibits at this important gathering, and to that end they pledge themselves to work for a large and representative delegation and exhibits from this county and vicinity; and

"Be it further resolved, that they endorse the action of the bureau of immigration of the territory of New Mexico in furthering the plans of the said exposition throughout the territory and urge all other commercial clubs and similar organizations to co-operate with the said bureau of immigration in every way possible."

This exposition is one of the important gatherings which will be held this fall, at which it is desired to make a good exhibit from San Miguel county. Neither the secretary of the club nor any committee from that organization can do all the work in arousing a sufficient interest in growing stuff especially for exhibition purposes, nor in preparing same after it is grown. The business men of the city can help out in this respect to a much larger degree than they probably realize. If each business man will keep the matter in mind and talk with the farmers concerning it upon every possible occasion, it will do much toward arousing interest and keeping the importance of the matter before them.

In addition to a discussion of the foregoing matter, the board of directors appointed a committee to confer with a like committee from the Masonic building association with reference to the Masonic building association purchasing the interest of the Commercial club in the second floor of the Masonic Temple. It is expected that these two committees will meet shortly and draft some sort of a proposition to present to the respective organizations.

PAPER MONEY TO BE SMALL AND DISTINCTIVE

Washington, Aug. 14.—Several important changes in the designs of the paper money of the country are to take place soon. Secretary MacVeagh, Assistant Secretary Norton and Director Ralph of the bureau of engraving and printing, have under consideration a general scheme for systematizing the designs of all issues of paper money in such a manner that the same portraits and emblems will appear on all notes of the same denomination. It can be stated authoritatively that a portrait of the late Grover Cleveland soon is to appear on all ten-dollar bills.

Distinctive designs for one-dollar, five-dollar, twenty-dollar and fifty-dollar bills, and perhaps those of even higher denominations, have been prepared. The two-dollar bills may be abolished, it is reported. If the two-dollar bill is retained, it is certain that its design will be such as to make it stand out from a pile of one-dollar and five-dollar bills with a prominence that will permit of no mistake in its handling.

Some treasury officials are inclined to favor even a more radical change, and recommend that paper money be reduced to about the size of French and Italian notes of smaller denominations. These notes are about three-fifths the size of the American kind and are more convenient to handle.
